WORKFLOW & WORKFORCE MANAGEMENT SYSTEM

EVENTUS® AND WASTE MANAGEMENT

www.eventus.eu

WHAT IS EVENTUS®?

Eventus® is a **MULTI AWARD WINNING ENTERPRISE WORKFLOW AND WORKFORCE MANAGEMENT SOLUTION** designed to dramatically increase the work efficiency of companies. Due to its core functions and architecture, Eventus® has the added advantage that it can act as a high level umbrella-application above existing subprocesses, harmonizing these, and can also play a significant role in the integration of enterprise applications.

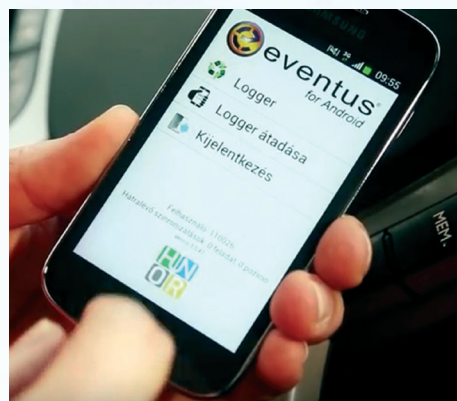

WHERE CAN IT BE USED?

Although Eventus® has its references in and is primarily dedicated to large corporations, it can also be utilized and used at mid-size companies **IN ANY INDUSTRY** where precise control of numerous workflows, tasks and staff is necessary or mission critical.

WMBS – WASTE MANAGEMENT BASE SYSTEM SOFTWARE

As a part of the HUNOR system the Waste Management Base System founded on Eventus® (WMBS in short form) supports the daily work of the National Waste Management Directorate helping to reuse as much waste from the more than ten million tons produced every year as possible. It ensures the cooperation with connecting subsystems, the tracking of waste collection and transport activities according to regulations, and it supports and aids – following the provided requirements – execution of review demands and review tasks.

WMBS is a complex IT system ensuring an efficient electronic data connection between the National Waste Management Directorate and its contractual partners and the government.

- A web GUI for partners where they can hand in settlements
- Strategic level decision support for analysis; models and simulations produced by the system
- Tracking and planning work and control processes
- Providing up-to-date information and analysis with modern reporting tools based on the emerging data
- Map tracking, allowing real-time tracking of the vehicles collecting waste
- A subsystem tracking the movement of waste which collects and forwards GPS data with the help of an Android smart phone
- Financial and management information subsystem providing full range controlling functionality, ensuring the comparison of plan and facts and preparing prognoses

ADVANTAGES

- Less bureaucracy
- Detection of abuse more efficient, supporting a more efficient distribution of EU funds
- More accurate data can be provided by eliminating calculation errors
- Cost optimization, cost planning
- Faster and more efficient measures in case waste is disposed of illegally
- Decreasing administration burden and less paper usage as a consequence
- Centrally defined processes; Strictly followed rules; Ability to measure and evaluate all areas; Proven corporate efficiency; Enhanced customer satisfaction; Decreased churn; Transparency
- Continuously informed customers, even realtime; End-to-end view of processes; Quick introduction of new services and products; Better customer experience; Customer retention
- Optimal utilization of all resources; Central IT systems based on standard integration; Easy O&M; Turn-key implementation
- Fast RoI; Outstanding price/performance ratio; Optimized costs on the Eventus® supported functional areas

BOOST YOUR BUSINESS WITH THE FOLLOWING CUTTING EDGE FEATURES OF THE AWARD WINNING EVENTUS®

- Complete workflow and work force management
- SmartPhone / Tablet Clients for Your Field Force
- Client Side Integrated Map / Geographical data processing
- eOBU
- Map Based Central Dispatching - manual, semi-, or fully automated
- Integrated Bar Code Reading
- Personal Store Management
- HandHeld Device Camera Handling for photo documentation
- NFC Data Integration possibilities
- Automated Troubleshooting Engine for TCP/IP communication capable electronic device controlled systems (e.g. telecommunication networks, energy-, transportation systems, etc.)
- Multi-lingual support

EVENTUS® IN NUMBERS

Controls the work of more than 10 000 people
Performs more than 300 000 tasks daily
Dispatches and controls more than 50 000 tasks
to human work force
More than 50 000 000 processes executed by now
Integrated with more than 100 systems
Integration to more than 150 partner systems
More than 10 million integrated and managed devices

EVENTUS® HISTORY

15 years of acknowledged quality,
proven advantages
1999-2000 initial developments, first installation
2003 WfMC Silver prize
2007 TSS development
2012 European SW Award
2013 Oracle OpenWorld
